

Qlik Gold Client for S/4 HANA 8.7.3 Install Guide

This topic describes how to download and install Qlik Gold Client for S/4 HANA. This is only for new Qlik Gold Client S/4 HANA installations. It should NOT be used for any systems where Gold Client S/4 HANA is already installed. Applying these transports where there is already a Gold Client S/4 HANA installation could damage your Gold Client functionality.

First, create a Qlik ID for use on the download site and support portal. Go to <https://community.qlik.com/>. On the top right, click **Sign In**. If you already have a Qlik ID, simply log in. If you do not have a Qlik ID for this site, scroll to the bottom and click **Sign Up**. Enter your company email address and click **Get Started**. Complete the name and location information and click **Next**. Enter your job details and click **Next**. Retrieve the six-digit code sent to the provided email and enter into field **Verification Code**. Create a secure password and check the box to accept terms and conditions. Click **Start Using Qlik**.

Once registered and logged in, go to the Qlik Download Site found at <https://community.qlik.com/t5/Downloads/tkb-p/Downloads>. The path is on the Community is Support -> Product News -> Downloads. Select the option for Data Integration and use the Product filter to select **Qlik Gold Client for ERP**. Download the following files:

Qlik Gold Client for S4 HANA 8.7.3 Install Files.zip
Qlik Gold Client 8.7 Security Guide.pdf

The first set of transports are the main Gold Client programs and are Client Independent. Import the following transports into your S/4 HANA landscape in the order listed below and ONE AT A TIME:

1. GCSK900123 - Main Gold Client Component (Qlik Gold Client 8.7.3 S4 HANA Install.zip)

The following transports are Client Dependent and can be imported upon successful completion of the above transports. They should be imported into any clients where you wish to export or import data:

2. ERDK9G00G7 (Qlik Gold Client 8.7.3 ECC Scenarios.zip)
3. ERDK9G00G1 (Qlik Gold Client 8.7.3 Configuration.zip)

Once the transports are successfully applied, execute transaction ZGOLD and enter the provided license key with the Production system ID. This needs to be entered once in each system where you want to use Gold Client.

Please see the Qlik Gold Client 8.7.3 Release Notes (<https://community.qlik.com/t5/Release-Notes/Qlik-Gold-Client-for-ERP-8-7-3/ta-p/1976562>) for more information on this release. The Implementation Guide and Security Guide will be discussed on a future technical call. To visit the support site directly, go to <https://community.qlik.com/t5/Support/ct-p/qlikSupport>.
